

## Assignment 9: ASTR/PTYS 578

### Section 3 of your real proposal

DUE : April 16th 2026 by 5 PM on D2L NOTE: This assignment will not be graded

FILENAME: LastName\_Assignment9 (Word doc)

- 1) Use the HST/JWST Template
- 2) Flush out Section 3 from your Outline.

**Not to Exceed 3/4 page, 12 pt font - remember the whole science justification must be less than 3 pages, including the figure, excluding bibliography**

Create a descriptive heading that states the strategy → “This Proposal: Observe/Model This Thing”

#### Paragraph 1: The Target

- Introduce and Discuss the target in more detail (imaging/spectra/archival data/models/simulations of **what** astronomical object )
- Why this facility? (Why HST/JWST? ) –

#### Paragraph 2: The strategy to generate the key component

- Start with “We Propose ...obs/models... of [this target]”
- Then go into more detail
  - For GO: describe the proposed observations \*briefly/succinctly\*
  - For AR/Theory: describe \*briefly\* the analysis method/proposed usage of simulations/codes and relation to existing/future HST/JWST data sets.
- You must reference the figure in this paragraph to explain the strategy,

#### Paragraph 3: The product --- Leads into next section where you explain the importance of the solution

- One Sentence - Outline the primary product(s) of the program (one/two primary outcomes – ideally ONE) . There may be other products – save those for section 4
- One Sentence – State that product solves the problem

Include appropriate references.

3) **Include a Figure** that explains the strategy/target/solution Figure and caption instructions are in Assignment 4. **This can't be more than ½ a page** including the caption.

4) Include the Abstract as a **separate page** before the Science Justification

5) Include Section 1 and Section 2 in your submission for the Science Justification – put the Section 3 text at the end.

6) Update the Bibliography
